Cyber Defence

Asset coverage report

OTY Heavy Industries · Generated 19 November 2026, 11:26 UTC by Ola Analyst · Scans counted within 90 days, SIEM events within 30d · Confidential

11 registered assets (from oty-register-v2.csv, imported 19 Nov 2026). 3 have been covered by a vulnerability scan in the last 90 days, 3 carry an endpoint agent (2 connected), and 5 have sent events into the SIEM (2 by syslog). 10 assets have at least one gap, 2 of them marked critical. 3 hosts seen by the SOC are not in the register.

REGISTERED	SCANNED	ENDPOINT AGENT	IN THE SIEM	SEEN, NOT REGISTERED
11	**27%**	**27%**	**45%**	**3**
2 critical with a gap	3 covered · 1 stale · 7 never	2 connected · 1 not connected · 8 none	3 by agent · 2 by syslog · 6 nothing	known to a source, absent from the register

Every asset, gaps first

ASSET	ADDRESSES	TYPE · OWNER	SCANNED	AGENT	SIEM
OTY-FW01 Critical	10.20.0.1	Firewall Network · Crewe	○ Never	○ None	● Syslog 19 Nov 2026
OTY-PLC-07 Critical	10.30.0.9	OT controller Plant · Crewe	○ Never	○ None	○ Nothing
oty-app01 High oty-app01.corp.oty.test	10.20.0.31	Server Dev Team · Crewe	○ Never	○ None	● Agent 19 Nov 2026
OTY-FS01 High oty-fs01.corp.oty.test	10.20.0.22 10.20.9.22	Server Rhea Okafor · Crewe	● Yes 9 Nov 2026 · Nessus (internal) · Weekly internal	◖ Disconnected oty-fs01.corp.oty.test · 16 Nov 2026	○ Nothing
OTY-LT-0042 Normal		Laptop Finance · Mobile	○ Never	○ None	○ Nothing
OTY-LT-0043 Normal	10.20.5.43	Laptop Sales · Mobile	○ Never	● Connected OTY-LT-0043 · 19 Nov 2026	● Agent 19 Nov 2026

OTY-SW-CORE High	10.20.0.2	Switch Network · Crewe	○ Never	○ None	● Syslog 17 Nov 2026
OTY-WEB01 High www.oty.test	203.0.113.10	Server Marketing · Cloud (AWS)	● Yes 14 Nov 2026 · Nessus (external) · Monthly external	○ None	○ Nothing

ASSET	ADDRESSES	TYPE · OWNER	SCANNED	AGENT	SIEM
OTY-DC01 Critical oty-dc01.corp.oty.test	10.20.0.21	Server Rhea Okafor · Crewe	● Yes 9 Nov 2026 · Nessus (internal) · Weekly internal	● Connected OTY-DC01 · 19 Nov 2026	● Agent 19 Nov 2026

Matched by name (short or fully qualified) or by any address. *Stale*: scanned, but not in the last 90 days. *Silent*: an agent connected but sending nothing for a day. Rows shaded have a gap.

Seen by the SOC, not in the register (3)

Hosts a scanner covered, agents enrolled, or hosts with SIEM events whose name and address match nothing in the register: missing from it, or named differently.

HOST	ADDRESS	SEEN BY	LAST SEEN
OTY-LT-0099	10.20.5.99	agent (active), SIEM events	19 Nov 2026
10.20.0.250		syslog	19 Nov 2026
203.0.113.77		scanner	14 Nov 2026

How this is worked out

- The register is the client's own list, uploaded in Pulse and mapped column by column; the figures are measured against it, not against what the SOC happens to see.
- **Scanned** means a vulnerability scan (Nessus or OpenVAS, internal or external) recorded the asset by name or address within the last 90 days.
- **Endpoint agent** means a Wazuh agent is enrolled under the asset's name or address; *connected* is the agent's own status.
- **In the SIEM** means events in the last 30d — from the asset's agent, or received over syslog from its address.
- A host seen by any source that matches no registered name or address is listed as not registered: the register may be missing it, or it may be known by another name.
